

Sean Goldsworthy

AI Analytics Lead | Analytics Transformation | Semantic Data Architecture | Decision Intelligence
Swineshead, United Kingdom | spgoldy1995@hotmail.com | [LinkedIn](#)

Professional Profile

Analytics Manager with over 10 years' experience delivering commercial, customer and product analytics across international digital businesses, specialising in transforming complex commercial questions into measurable business outcomes. Combines deep analytical expertise with modern AI-enabled analytics to help organisations make faster, better-informed decisions through experimentation, customer insight, automation and governed self-service analytics.

Currently leading strategic analytics initiatives at Entain, partnering with executive leadership including the Chief Product & Technology Officer, Group Director of Data & Analytics, Deputy CFO, Chief Commercial Officers and Heads of Product to shape enterprise KPI strategy, AI adoption and commercial decision making. While remaining a highly hands-on practitioner, responsibilities have evolved beyond traditional analysis into defining analytics roadmaps, influencing product direction, mentoring analysts and designing scalable analytics capabilities used across multiple business functions.

Career Highlights

Commercial Impact

- Led analytical strategy behind the Ladbrokes & Coral Sportsbook Relaunch — experimentation frameworks, forecasting models and statistical evaluation across ten major product enhancements, contributing to a **30% increase in Net Gaming Revenue**.
- Designed lifecycle analytics and retention strategies for Casino Early Life — churn analysis, customer segmentation and LTV modelling to improve **30-day customer retention by 5–25%** across multiple regulated markets.
- Optimised casino homepage merchandising through commercial modelling of RTP, slot margin, bonus cost and player behaviour — **12% growth in NGR** while improving slot margin by 1 percentage point.
- Designed experimentation frameworks for BetMGM Nevada's Shared Wallet expansion — demonstrating **10% improvement in retained player value**.

Product & Analytics Leadership

- Product Lead for Entain Incyte — enterprise AI self-service analytics platform supporting **304 active business users** across Sports, Casino, Payments, Onboarding and Commercial.
- Designed and implemented Goal Trees framework — aligning executive objectives with governed operational KPIs across Acquisition, Sports, Casino and Payments.
- Established governance for **246 enterprise KPIs** through Snowflake Semantic Views.

AI & Innovation

- Designed and deployed production Snowflake Cortex AI Agents for the Deputy CFO and Chief Commercial Officers — natural-language access to governed financial and commercial data.
- Built AI-enabled analytics ecosystem combining Cortex, Sigma, semantic modelling, forecasting and automated executive narratives.
- Reduced dashboard delivery time by **60%** through Python automation and REST API integrations.

Selected Strategic Programmes

Programme	Focus	Outcome
Entain Incyte	Enterprise AI Self-Service Analytics Platform	304 active users
Executive Intelligence Programme	AI Agents for CFO & Commercial Leadership	Production deployment
Goal Trees	Enterprise KPI Strategy & Governance	Executive decision framework
Sportsbook Relaunch	Product Analytics & Experimentation	+30% NGR
Casino Early Life	Customer Analytics & Retention	+5–25% Retention
Casino Merchandising	Commercial Analytics & Optimisation	+12% NGR
BetMGM Nevada Expansion	Experimentation & Behavioural Analytics	+10% Player Value

Executive Stakeholders

Trusted analytical partner to senior leaders including:

- Chief Product & Technology Officer
- Deputy Chief Financial Officer
- Group Director of Data & Analytics
- Chief Commercial Officer (UK & Ireland)
- Chief Commercial Officer (ANZAC)
- Head of UK Commercial
- Head of Sports Product
- Head of Casino Product
- Head of Payments Product
- Head of Onboarding Product
- Engineering Leadership
- Commercial Strategy Leadership

Professional Experience

Lead Data Analyst (progressed into Analytics Manager responsibilities)

Jan 2023 – Present

Entain

Promoted into a lead role responsible for delivering commercial and product analytics while progressively expanding into analytics leadership, enterprise AI strategy and executive decision support. Operate as the analytical partner for Product, Commercial and Executive Leadership.

Analytics Leadership & Strategic Ownership

- Defined the long-term product roadmap for Entain Incyte, supporting 304+ active business users across Sports, Casino, Payments, Onboarding and Commercial functions.
- Partnered directly with CPTO, Deputy CFO, Group Director of Data & Analytics, CCOs and multiple Heads of Product to translate strategic objectives into scalable analytical solutions.
- Led discovery workshops transforming ambiguous commercial questions into structured analytical programmes.
- Introduced product-thinking into analytics delivery — treating dashboards, semantic models and AI agents as long-term products with roadmaps, adoption metrics and continuous improvement.
- Acted as technical authority for AI-enabled analytics, providing architectural direction across semantic modelling, AI agents, automation and governed reporting.
- Mentored analysts on SQL development, analytical thinking, semantic modelling, AI-assisted coding and stakeholder engagement.

Commercial Analytics

- **Sportsbook Relaunch:** Led analytical design for Ladbrokes and Coral relaunch — forecasting models, A/B testing across 10 product enhancements, behavioural analytics isolating genuine uplift from seasonal variation. Delivered 30% NGR uplift.
- **Casino Homepage Optimisation:** Modelled RTP, slot margin, bonus costs and player behaviour. Delivered 12% NGR growth and 1pp slot margin improvement.
- **Sportsbook Goal Trees:** Partnered with Head of UK Commercial to define OKRs for UK Horse Racing. Built frameworks allowing leadership to monitor operational levers driving performance.

Customer Analytics

- **Casino Early Life:** Investigated significant early-life churn — combined retention analysis, churn modelling, segmentation, lifecycle analytics and LTV measurement. Improved 30-day retention by 5–25% across multiple markets.
- Regularly combined CRM, Product, Finance and Marketing data to understand complete customer journeys.
- Built behavioural models supporting commercial investment decisions across acquisition, onboarding, payments and gameplay.

Experimentation & Decision Science

- Designed A/B testing methodologies for multiple high-value initiatives across Sportsbook, Casino and BetMGM.
- **BetMGM Nevada:** Designed experimentation framework for shared wallet expansion — measured player engagement, deposits, cross-state behaviour and cannibalisation risk. Demonstrated ~10% improvement in retained player value.
- Combined experimentation with forecasting and historical baselines to isolate commercial contribution of new features.

AI & Analytics Innovation

- Designed and deployed production Cortex AI Agents — a 13-tool Deputy CFO agent covering revenue, P&L, budgeting, duty, taxation, customer economics, trading exposure, safer gambling and cash flow.
- Developed evaluation frameworks with 37+ production test scenarios before deployment.
- Introduced automated executive narrative generation replacing manual commentary with AI-generated insights.
- Built reusable Python deployment frameworks integrating Snowflake and Sigma through REST APIs — reduced dashboard delivery time by 60%.

Data Strategy & Analytics Engineering

- Designed enterprise semantic modelling strategy supporting governed analytics across Sports, Casino, Payments, Customer and Finance.
- Established governance for ~246 enterprise metrics, eliminating conflicting KPI definitions.
- Reverse-engineered undocumented Sigma API behaviour, enabling fully automated semantic model deployment.

Senior Commercial Analyst

Apr 2022 – Jan 2023

Flutter Entertainment

Delivered commercial analytics supporting one of the world's largest online betting and gaming organisations. Developed expertise in experimentation, forecasting and customer behaviour analysis. This role marked the transition from customer-focused analytics into product and commercial decision support.

- Partnered with Commercial, Product and CRM stakeholders to deliver analytical insight supporting strategic business decisions across Sportsbook and Gaming.
- Built commercial forecasting models supporting investment decisions, promotional planning and operational performance measurement.
- Designed A/B testing frameworks supporting commercial and product initiatives.
- Delivered customer lifecycle analysis covering acquisition, onboarding, retention, engagement and customer lifetime value.
- Presented complex analytical findings to non-technical audiences, translating statistical concepts into commercially meaningful recommendations.

Customer Insights Analyst

Jun 2019 – Apr 2022

Paddy Power Betfair

Developed deep expertise in customer behaviour, segmentation and marketing analytics. Established the analytical foundations that later expanded into commercial strategy, product analytics and executive decision support.

- Analysed customer behaviour across the complete lifecycle — identifying opportunities to improve acquisition quality, retention and lifetime value.
- Built customer segmentation models for Marketing and CRM teams to understand behavioural differences between customer groups.
- Evaluated promotional performance and campaign effectiveness using behaviour, engagement and commercial outcomes.
- Combined customer, financial and marketing datasets to understand relationships between acquisition activity and long-term profitability.

Screening Analyst

Nov 2017 – Jun 2019

Wealth-X

Analytical research supporting intelligence on ultra-high-net-worth individuals. Developed strong analytical discipline, attention to detail and evidence-based decision making with complex datasets.

- Conducted analytical screening across international high-net-worth datasets with strict quality and governance standards.
- Applied structured analytical thinking to incomplete or ambiguous information.
- Maintained high accuracy standards within demanding operational deadlines.

Technical Capability

SQL	Advanced
Python	Intermediate (AI-assisted development)
Snowflake	Advanced
Snowflake Cortex	Advanced
Sigma Computing	Advanced
Power BI	Advanced

Semantic Models	Advanced
REST APIs	Advanced
Git	Intermediate
BigQuery	Working knowledge

Domain Expertise

Sports Betting • Online Casino • Gaming • Product Analytics • Commercial Analytics • Finance • Customer Analytics • CRM • Payments • Onboarding • Executive Reporting • AI Products

Education

MEng Civil Engineering — University of Portsmouth (2017)

Developed transferable skills including statistical analysis, mathematical modelling, optimisation, systems thinking and solving complex problems using data.

Professional Development

Currently focused on: Production AI Agents • Semantic Modelling • Product Analytics • Experimentation & Causal Inference • Decision Intelligence • Analytics Engineering • AI-assisted Development • Executive Decision Support Systems
